🔴 Transcribing Interviews is a Pain

- ⏳ It takes hours to type out every word manually.

- 🙍 Identifying different speakers is confusing and error-prone.

- 🗑️ Filler words like "uh," "you know," and "like" clutter the transcript.

- 🎥 Most transcription tools ignore video and focus only on audio.

- 💻 Existing tools are complicated, costly, or require editing on a PC.

🟢 EchoScript – Record. Transcribe. Polish.

- 🎬 **Records video and audio directly on your phone**

- ✍️ **Instantly transcribes the entire conversation**

- 🙋 **Identifies and separates different speakers**

- ✂️ **Removes filler words automatically (optional toggle)**

- 🧹 **Cleans and formats the text into a readable script**

- 📂 **Lets you save, edit, and export your script – all in one app**

🧑 Designed for People Who Talk & Create

- 🎙️ **Journalists** – to transcribe interviews quickly

- 🎥 **Content creators & YouTubers** – turn videos into readable scripts

- 👩‍🏫 **Students & researchers** – capture project discussions and lectures

- 💁 **Professionals** – record and organize meetings or panels

- 👬 **Podcasters** – clean transcripts with speaker separation

- 🧠 **Anyone tired of typing audio manually**

🔄 From Recording to Ready Script – In 4 Steps:

1. 🎥 **Record**
   Start video/audio recording right from the app.

2. 🧠 **Transcribe with AI**
   Automatically convert speech into text using on-device AI.

3. 🗣️ **Identify Speakers & Clean Up**
   Detects different speakers + removes filler words (optional).

4. 📄 **Edit & Export**
   Review, edit names, and export the script in text or PDF.

⬛ **EchoScript vs. Other Tools**

Feature	✅ EchoScript	❌ Other Tools
Video + Audio Support	✅	❌
Real-Time Transcription	✅	⚠️ Sometimes
Speaker Diarization (Name Editing)	✅	❌
Filler Word Removal	✅	❌
Fully Mobile (No PC Needed)	✅	❌
Clean Script Export (PDF/Text)	✅	⚠️ Limited

What's Next for EchoScript?

- 🌐 **Cloud sync & cross-device support** – edit scripts anywhere, anytime

- 🎤 **Multi-language transcription** – break the language barrier

- 🎛️ **AI-powered summary & highlights** – get key takeaways instantly

- 📊 **Analytics for interviews** – talk time, speaker balance, and more

- 🧩 **Plug into podcast and video editors** – faster post-production

- 🎙️ **Live captions & subtitles** – accessibility and content-ready

🎯 **The Vision:**

To be the **go-to AI companion** for creators, journalists, students, and professionals who work with voice, stories, and conversations.

💡 **Let's Redefine How We Capture Conversations**

"From spoken words to smart scripts — effortlessly."

📲 **EchoScript**

The future of interviews, meetings, and creative storytelling.
